Instructions.

Weather Enclosure available as an optional extra

The Powerhouse Duo+2 Hospitality Buggy, you will have everything required to effortlessly carry two/four adults around your chosen area. At your disposal, is a very capable machine. The transmission powers the rear wheels, virtually silently through a none maintenance Differential gearbox. This is in turn powered by an impressive 2.2kw motor. Powered by a 105Ah single Lithium battery, capable of powering the buggy around 2-3 rounds of golf on a single charge. Offering maintenance free charging with massive weight saving and charge time. Speed and overall control is governed by a 48V Curtis management system. In short, the Duo+2 buggy will travel at 15mph maximum speed for a distance, in the region of 25 miles, with two or four people aboard. The rack and pinion steering is light and precise, and braking is uncomplicated. using a combined pedal with anti roll brake. Battery upgrade to Lithium is available.
