The Powerhouse PGT (Personal Golf Transport)

Are you looking for something different? Then the PGT may well be the answer. The PGT gives you the freedom to virtually glide around any modern day golf course with ease.

It is a personnel transporter that is designed to carry a single adult and full set of clubs effortlessly with minimum of fuss. The technology allows you to simply stand on the platform and gently lean in the direction you would like to go and at a speed that suits.

When you arrive at your location, just step off backwards and everything comes to a stop. Position the PGT so that your clubs are vertical and you are ready to continue your golf. Moving off, place your club into your bag and step on to the platform and gently lean forward and the PGT will gently move away, what could be simpler?

The PGT is powered by 48v twin LIFE PO4 Lithium batteries. The PGT has on board charger so just plug in the lead into the mains and leave to charge. Full charge takes in the region of 6 hrs. So it won't be long before your back on the fairway. Gyroscopic technology makes the PGT appear motionless whilst you are stood on it, waiting for your command, so no special balancing skills are needed. Keyless entry system provides you with a machine that requires no keys to operate.

The small LCD module can fully program all aspects of the PGT including the on/off functions. When not in use the module just lifts away from the dashboard and taken away just like a conventional set of keys.

The PGT cannot be used in any way without it, (that is why 2 modules are supplied as standard. In line with Powerhouse Golf Lithium batteries, the PGT uses Life PO4 as standard. Guaranteed for 2 years with a life expectancy of around 1500-2000 charges and will propel a user around 15000 yards on a single charge.

The PGT is fitted with 20" treaded tyres on superbly designed aluminum wheels.

So should the mood take you, you can transfer from the golf course, to the beach, to woodlands and any off road situation that takes your fancy. The PGT comes with everything you need.

Even a seat option is available. The only thing you need is the confidence to try something new and give your self the freedom personnel transport can offer.
