TRAILER-2-GO MESH

TRM001

Within the trailer manufacturing industry, Indespension are considered to be one of the best. Their products are used world wide, in many different applications. That is why the Powerhouse Golf Trailer-2-Go uses the highest quality Indespension components available. Giving complete peace of mind.

Fixing clamps
hold buggy firmly down to trailer base. Eliminates the need of straps. Available as an optional extra. (Pro/Titan models only)
TR010

Specification and Sizes

- Bed Length: 58" (1300mm)
- Bed Width: 40" (1100mm)
- Overall width to outside of wheels: 58" (1300mm)
- Overall Length: 89" (2226mm)
- Height from ground to bed: 12" (300mm)
- Tail Gate: 21" (530mm)
- Tow ball: 50mm
- Tyres: Tubless 4.80/4 - 8"
- Net weight: 44kg

Contents: 1 x Trailer
1 x Light board
2 x Mudguards
2 x wheels

Close Up...

The Trailer-2-Go Mesh is specifically designed and built for the easy loading and unloading of your **Powerhouse** Golf buggy. The trailer Ramp and main body is made from open steel 2mm steel mesh, dipped in galvanized finish.

The main sub frame and body of the trailer is made from 2" steel hollow tube also galvanized making the trailer fully weather resistant for many a year to come.

The styling of the trailer makes it very light to handle and manoeuvre. It incorporates all "Indespension" components including 350kg Trailing arm suspension units and high-speed tyres.

One other main feature of a an open mesh design is that the trailer does not suffer from "drifting". This is the effect of the trailer trying to lift as the air passes under the underside whilst driving, very common on trailers with a solid base.

The Trailer-2-Go Mesh uses
Trailing arm Suspension units
and high speed tyres.

FOLDING RAMPS

Aluminum Folding Ramps

Constructed from aluminum incorporating claw fitting. Designed to be folded in the centre making each ramp extend from 45" to a max length of 90". The track surface has a tread raised section for high grip.

- Extended 90"
- Folded length 45"
- Width 11"
- Capacity 175kg per ramp
(evenly loaded)

Note: See our web site for demo on loading and unloading options.
