Having a single seater golf buggy should not mean compromising or giving up on all the comfort and luxury offered by the double seater models.

The **Powerhouse** Uno is very much based on the design and build of it's sister buggy, the Duo. Under the covers of the Uno, the comparison is very easy to spot. Rack and pinion steering, full digital speed controller unit, drum brakes and foot operated controls. Once on board you will soon appreciate how the uno buggy feels and drives just like the larger models.

Foot operated controls and the positive steering makes your experience a pleasurable one. This buggy is designed for the single user in mind, but without giving up on standards or expectations.

We believe your Buggy is only as good as the batteries that power it. That is why we have specifically designed a single **LITHIUM** battery purely for this model. This means the battery you have fitted to your buggy will perform time and time again.

The Uno buggy is supplied in Ivory White, displaying the Powerhouse logo.

To compliment the Uno, an array of accessories are available as follows: Side weather protectors, Alloy wheels, Wooden dashboard, Cup holders, Windscreen and trailer.

Its all here. So Indulge yourself, with a buggy that packs all the home comforts you would normally expect from one normally reserved for the hire market.

Uses:
Recreational and Professional
